People Do Projects

Projects are done by many stakeholders, not just the project manager. So all stakeholders need to know what is happening, what they need to do and what has been done.

What Stakeholders do now

Stakeholders spend a lot of their time sorting out what is happening and what they need to do, when and with whom. They know if they don't know about or forget to do something important that they will let the team down and damage the project. Many stakeholders use ToDo lists to manage their contribution to the project and its interaction with other activities.

The Challenge

What is needed is a simple technology that makes it easy for all stakeholders to continuously plan and productively navigate through the project and other activities. The technology must fit together everything that is happening and then sort out, update and personalise information in context for each stakeholder. In addition, participants need an easy way to tick off what they have done, so relevant people can be informed about what has been done, and progress tracked and reported.

The solution is WorkNav

WorkNav makes it easy for all stakeholders to continuously plan and work together to get projects and other activities done concurrently. WorkNav helps each stakeholder find and sustain their best, most productive path through projects and other activities.

WorkNav makes it easy for everyone to enter, update and view relevant task detail from anywhere at any time. A Live plan workflow and a personal To Do list show what you need to know and do for all projects, tasks and processes.

Why is WorkNav Different?

WorkNav sorts out, organizes and shows the information you need to know from **both** a project perspective and your perspective. Traditional project management software only shows information from a project perspective and makes you find, sort out and organize the information that is relevant to you.

Only using a project perspective makes it very hard to bring together relevant information from many projects and activities, whereas WorkNav instantly brings together the information you need.

WorkNav provides all stakeholders with relevant, understandable and actionable information, when and where they need it. Not just the project manager.

Reduce Organizing and Reporting Time by up to 50%

WorkNav significantly reduces the time you need to spend finding out what you need to do and keeping track of what has been done. When team members update what they are doing, WorkNav automatically keeps other team informed.

This eliminates the need for many meeting and other communications designed to keep team members informed about what they need to do and what has happened. When people work in different locations, reducing meetings to organize and report on projects and manage flow-on effects to other activities can save up to 50% of available time.

People intensive Projects

WorkNav works best for projects where stakeholders need to productively work together to get the project done. For stand-alone projects, where the management of non-people resources and clear processes dominate, like in construction, traditional project management works best.

Privacy and Security

WorkNav uses a patented method to maintain control of and the privacy and security of task information. It is simple to apply, because the person responsible for each task or their delegate controls who can see the task.

Stay Informed

WorkNav keeps relevant people informed by email about any changes that affect them.

Send To Do's to your Calendar

You can email a To Do to anyone to add to their calendar.

Free Easy Access

WorkNav free online software and free apps make it easy to access your personal To Do list when you need it.

Key Benefits:

- Get projects done better & faster with less stress
- Get need-to-know, understandable and actionable information, anywhere at any time.
- Reduce meetings and other communications
- Stay in control of what you are doing
- Keep tasks synchronized with anyone – stakeholders, family, friends, work colleagues and other people
- Easy to use with StepThru assistance to get started
